Right Mask for the Right Task

PASTURE PHARMA IS A GLOBAL PHARMACEUTICALS COMPANY BASED IN SINGAPORE WITH R&D AND MANUFACTURING FACILITIES IN TAIWAN, CHINA AND THAILAND

AIRBORNE BIOLOGICAL, INDUSTRIAL & ENVIRONMENTAL POLLUTANTS

POSE A CONSTANT THREAT TO THE
HEALTH OF INDIVIDUALS

Pasture have been focusing on R&D of surgical masks and respirators since 2005.

Using advanced ergonomics and filtration technology, plus designed for sealed protection and long-lasting comfort, Pasture developed a range of highly effective and protective masks and respirators essential to help protect front-line healthcare caregivers, occupational users, and the general public during pandemic outbreaks.

Pasture is one of two companies in the world with US FDA cleared pandemic N95 respirators recommended for public use during medical health emergencies.

With Pasture Mask – the air is “Safe2breathe” again!

MASKS

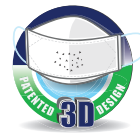

FOR THE WHOLE FAMILY

Pasture's very own face masks designed with children and elderly in mind to provide optimal protection while ensuring uncompromised comfort for the young and elderly

Regardless of age, our range of specially designed masks has the entire family covered, protecting you and your loved ones

PASTURE SPECIALLY DESIGNED N95 MASKS DESIGNED FOR SECURE PROTECTION AND LONG-LASTING COMFORT

VIRAL FILTRATION EFFICIENCY (VFE) / BACTERIAL FILTRATION EFFICIENCY (BFE)

Pasture N95 Respirators and Masks are tested against virus and bacterial with > 99% efficiency. During airborne pandemics and public health emergencies, you can choose not to eat or drink - but you cannot choose not to breathe! PROTECT yourself!

PM 2.5 FILTRATION EFFICIENCY

Pasture N95 Respirators and Masks are tested against PM 2.5 with >99% filtration efficiency. PM 2.5 is detrimental to human health as they have the ability to travel deep into the lungs, causing serious respiratory injuries and cancer

LOWER LEAKAGE LEVELS

Pasture N95 Respirators and Masks are developed to help reduce inward leakage (Protect User) and outward leakage (Protect Others). This would help reduce exposure to airborne biological pathogens (for Healthcare Users) and cancer-causing pollutants like PM 2.5 (especially for the Elderly and Children)

RESEARCH & DEVELOPMENT (R&D)

We do not just manufacture Masks, we utilise disruptive technologies to present improved Respirators and Masks to the Right Users for the Right Tasks

EZY-BREATHE TECHNOLOGY

Pasture Ezy-Breathe Technology combine Protection, Function and Comfort. Pasture Masks = High Filtration Protection + Lower Leakage Level + Ezy2breathe
